

CUSTOMIZED INVENTORY MANAGEMENT SOLUTIONS

We Manage Your Inventory So You Can Manage Your Business

Falcon Metal manages Class “C” components for original equipment manufacturers (OEMs). Our focus is on increasing production efficiency, lowering risk, and reducing cost. We achieve these results in a number of ways including implementation of inventory management solutions, commonly known as Vendor Managed Inventory.

We partner with leading manufacturers and deliver comprehensive, easy-to-implement solutions that are customized to meet your unique business needs.

Companies define their Class “C” components in many different ways. They can vary from fasteners to plastic parts, and standard to special components.
